

Write an equation of a line that is parallel to the x and y axis.

Write the equation of a line that contains a given point and is parallel to a given line.

Taking a point and the slope and constructing the equation.

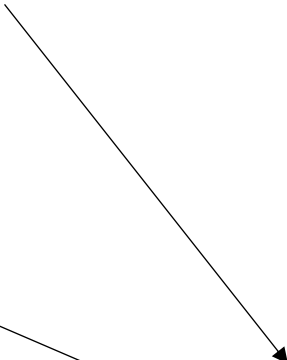

Get a line with just two points

The slope and y-intercept

What it means to be parallel to a given line

The formula or how to derive the equation of a line.

Getting a point on a Graph.

Write the equation of a line
